Industry Challenges

01 Marketing Competition

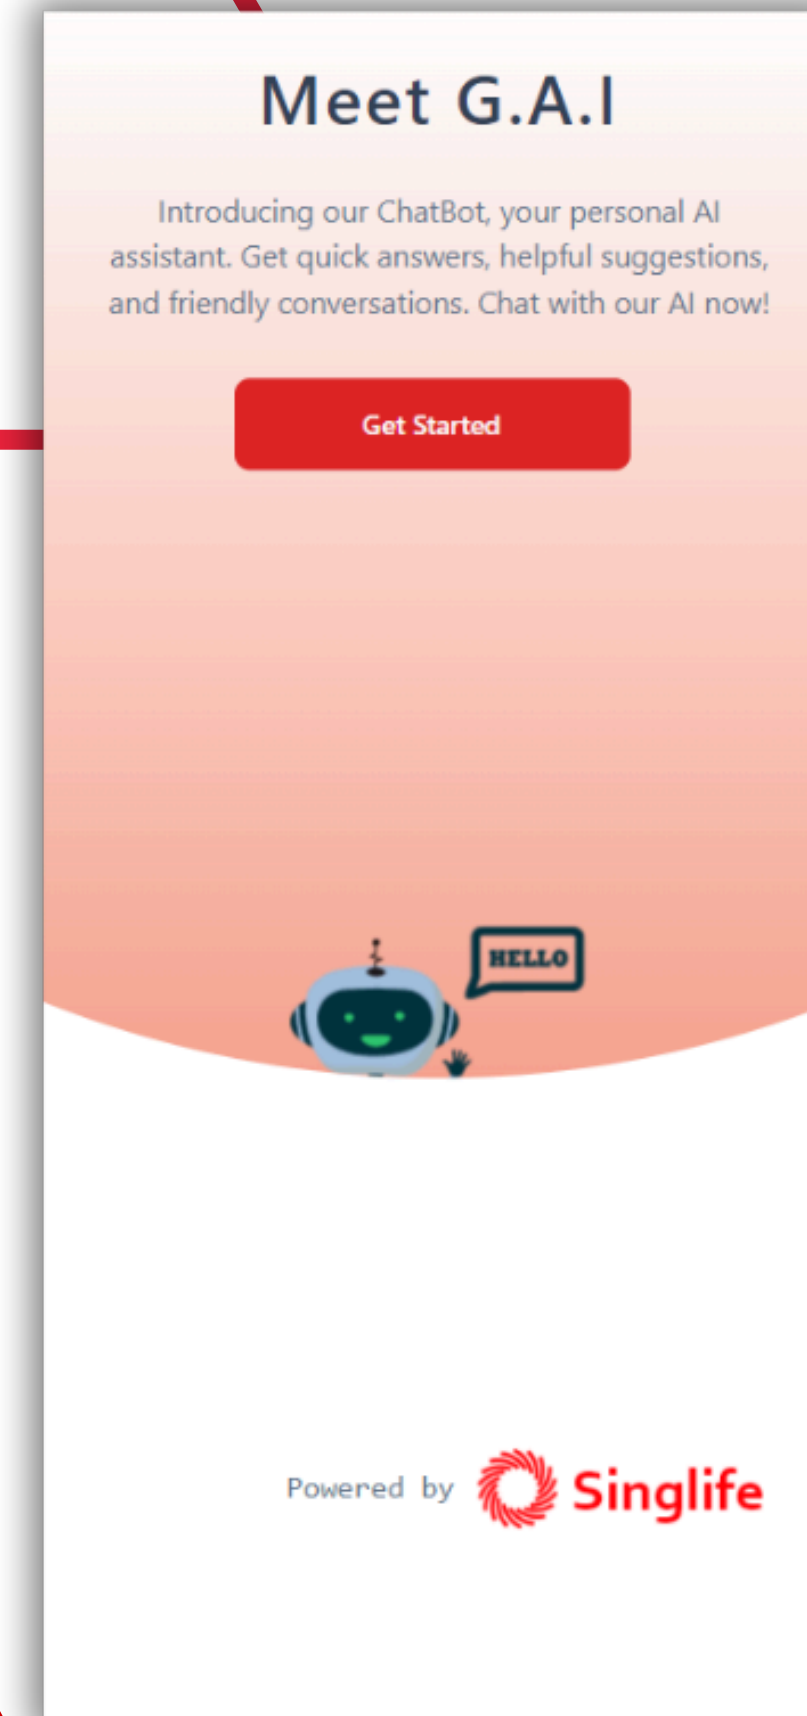

- *Competitive industry in sg*
- *Esp. new entrants*

02 Appealing to Young Audiences

- *Perception of low risk*
- *Different preferences and priorities*

Our Proposed SOLUTION

*Team Auraburos
Generative AI*

Powered by  Singlife

How Does It Work

ChatBot

Generative A.I

SingLife Data Source

- Existing Customer Policy
- Product Information
- Product Statistics
- Marketing Campaign
- Representative Feedbacks

OTHERS Data Source

- GOV Statistics
eg PMO on Population
- Life Insurance Assoc
- Others

• Chatbot

This is an important source to allow SingLife to quickly build up a database of information to support the AI model to improve the generative AI knowledge.

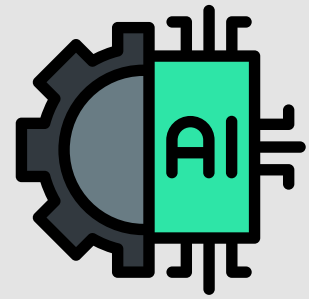

Example Demographic, Popular Questions, Trend.

Output

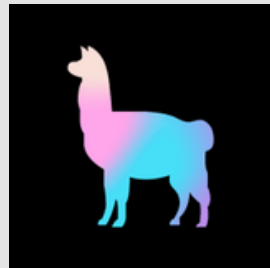

- Recommendation of Products
- Generative AI output a Summary (Profiling, recommended Products, statistic, charting etc) to help customer summarize their needs, and help SingLife Representative follow-up more effectively with the right and updated information.
- Generative AI output proposed Training (based on trending, statistics etc) to help SingLife plan on training for the representative etc.
- Create Idea for new Product.

Technology

Large Language Model (LLM)

LLMs are language models with vast size, utilizing artificial neural networks and self-supervised learning. They possess remarkable emergent properties and excel in natural language processing tasks.

LlamaIndex

LlamaIndex serves as the bridge connecting the vast array of unstructured data present in the world with the LLM (presumably referring to a specific system, technology, or platform).

LangChain

A flexible and adaptable framework that can be used to build various powerful applications by leveraging language models.

OpenAI

A research center, widely known for ChatGPT, a Generative AI application

FUTURE FEATURES

ENHANCED CUSTOMER SUPPORT

- redirect user to Singlife if chatbot is unsure of some questions
- daytime -> notify Singlife agent
- nighttime -> notify Singlife via email

DEPLOY CHATBOTS AS ROBOTS

- kiosk instead of agent at marketing campaigns
- physically assists customers enquiries
- guides customers during product processing

BUSINESS OPPORTUNITY

- analyse sentiment of users through chat history
- positive -> offer suitable recommendation of product(s)
- promote products or connect user with agent
- convert user to customer

Why Focus on **GenAI** with BOT?

by Team Auraboros

Scalability

GenAI bot allows Singlife to scale to handle more queries, less manpower and speedy deals closed.

Achieves : Sustainable Practices

Personalisation

GenAI captures pertinent user information to enhance product recommendations, and offer personalised product for customers through synthesizing their conversation with the Bot.

GenAI can also produce human-like reponses that helps customer to better understand Singlife products.

Achieves : Customer Centric

Why Focus on **GenAI** with BOT?

by Team Auraboros

Future Proof

BOT implementation is versatile and engaging, and custom data from Singlife can be used to train/fine-tune LLM to take advantage of the capabilities of Generative AI.

Achieves : Next-Gen Products & Services

Accessibility

BOT provides 24/7 availability and robust data security, ensuring that customer accessibility remains seamless and uninterrupted..

Achieves : Digitally Enabled

Why Focus on **GenAI** with BOT?

GenAI
by Team Auraboros

Insight

Using GenAI, information captured from the conversation with the BOT can generate insights that enables Singlife to create unique products focused on their target audience, enhancing staff's understanding towards users' behaviour.

Significant time can be reduced to train talents within the organisation to aid in its growth and expansion by capitalising on GenAI capabilities such as text summarisation of product and policy information.

Achieves : Future-Ready Talents

By leveraging **GAI,
we embrace user **empathy** and **trust**, while
fostering **agile** actions, **collaboration**, and
ultimately **innovate** potential product
opportunities.**

Thank **YOU!**
